

LIFT

Brick & Patio Cleaner

Fast and Easy to Use

Removes Mortar, Salts, Algae, Moss from all Stone and Brick Surfaces

- Blend of detergents, acids, inhibitors make it twice as effective as old-fashioned acid type cleaners.
- Acts rapidly dissolving the carbonates which hold deposits together.
- Reducing expensive clean-down time.
- Removes salt effervescence (white staining).
- Cleans away dirt and algae from paving slabs without removing colour.
- Use for cleaning brickwork, patios, garages, pool surrounds, paving, concrete, floors and warehouses.
- Rapidly kills and removes unsightly moss and weed investigation, leaves surfaces like new.

Powerful Cleaner

LIFT contains a blend of safe powerful acidic detergents and surfactants to remove excess mortar and salt effervescence (white staining) from all types of brickwork and paving in on easy operation.

Safe & Fast Acting

LIFT is suitable for all types and makes of brick and stone and unlike some brick cleaners which soak into the brickwork and are difficult to remove, **LIFT** contains active detergents which actually pulls the contamination out of the pores of the brickwork, foaming away the deposits and leaving the brickwork or stone professionally cleaned. Safe to use on ferrous metals and most paint finishes.

Cleans Stone & Paving, Removes Algae & Moss

Use **LIFT** to clean away grime, algae and moss from patio tiles, slabs and paving. Removes slip in seconds. Restores the colour of coloured paving. Removes rust prior to re-painting. Use around pool sides to remove fungi and algae spores. Destroys the algae / moss root structure. Ensures surfaces are clean and slip free.

METHOD OF USE

Scrub or Spray Method

Wet area to be treated. Apply **LIFT** neat to 1:5 with water directly onto surface to be cleaned. Leave for contamination to breakdown approx 5 mins to 20 mins. Agitate with stiff brush and rinse thoroughly with water.

Immersion Method

Use **LIFT** in a plastic bath into which articles to be treated are dipped. Allow articles to remain until contamination is dissolved. Rinse thoroughly with clean water.

N.B. Do not use neat on stainless steel, galvanised, tin, aluminium, zinc or other similar surfaces.
