

# Glass Wash Detergent

## Machine Glass-Washing Detergent

*Keeps Glasses Sparkling Clean*

### HIGHLY EFFECTIVE

**Glass Wash Detergent** will clean thoroughly and effectively, removes soil residues including lipstick marks to leave a clean, bright finish with no smeary film. Softens the water to prevent scale formation and removes and prevents build up of stains

### STABILITY

**Glass Wash Detergent** is a stable product, non flammable, requires no special storing or handling facilities and has a freezing point of  $-5^{\circ}\text{C}$ .

### SAFE

**Glass Wash Detergent** is suitable for use in all types of spray glass-washing machines and on most types of surface including stainless steel, copper, plastics, rubber and ceramics.

### PERFORMANCE

**Glass Wash Detergent** will clean thoroughly and effectively, removes soil residues and leaves a clean bright finish with no smeary film. **Glass Wash Detergent** is excellent for use where there is tea or coffee staining and for all glass washing operations by machine.

### ECONOMICAL

The dilution rate of **Glass Wash Detergent** is dependant upon the degree of water hardness, as a guide a use concentration of between 1:1,000 and 1:1,800 in water is usual.

### USED BY

Local Authorities  
Restaurants  
Canteens

Hotels  
Schools  
Marine Industry

Hospitals  
Airports  
Holiday Camps

### CONTROL EQUIPMENT

Before using **Glass Wash Detergent** it is vital that the machine and crockery are properly de-scaled. The de-staining action of **Glass Wash Detergent** is dependant upon the amount of sequestering agent present, if the machine or crockery is scaled, de-staining will be poor, as the sequesterant is utilised in removing the scale from the machine and tableware surface.

For economy and convenience the amount of **Glass Wash Detergent** is either added by a semi-automatic or by a fully automatic system. For best results ensure that **Hydra Scale Free Rinse** is used in the rinse cycle.

**N.B.** Avoid contact with aluminium, zinc and alloys thereof.
