

FLAIR

Perfumed Germicidal, Phosphoric Acid Descaler & Cleaner

**Rapidly Removes Scale, Body Fats, Mould, Stains and Algae Build-up
from All porous and non-porous surfaces in the leisure industry.**

Fast Acting, Safe Cleaner De-Scaler

Flair has been successfully used for cleaning all wet areas associated with recreation for over 20 years.

Safe — Unlike other de-scaling cleaners **Flair** will not damage grouting, stainless steel or chromium.

Disinfecting Power

Flair kills harmful bacteria viruses which cause skin complaints including verrucas and athletes foot.

Flair is normally used once a week on wet floor areas to stop scale re-formation. For daily cleaning use: **Hydra Speed** or **Hydra Team Clean**.

Where to Use

To remove water scale and ground in body fats from walls and flooring in shower or toilet areas, in and around swimming pools, wet changing rooms, steam rooms, saunas, Jacuzzi's, stone or tiled stairs, on vinyl's, glazed and unglazed floor and wall tiles, terrazzo floors and drains and gullies. **Flair** will not damage tiled surfaces, grouting or stainless steel fitments.

Descaling Biocidal Action - Kills Bacteria

Surfaces contaminated by body fat and scale attract bacteria. Often detergents alone cannot rid the surface of harmful bacteria if the surface is also contaminated by scale. **Flair** removes both soiling and scale leaving surfaces extra clean. **Flair** contains powerful biocides which kill harmful bacteria and viruses including verruca spores seconds after application, leaving a fresh lingering perfume.

METHOD OF USE

Terrazzo, Tiled Flooring, Swimming Pools & Surrounds, Glazed Wall / Floor Tiles, Shower Areas

1. Dilute **Flair** 1:1 or up to 1:5 with water, depending on contamination.
2. Apply to surface using sponge, deck scrubber or mop.
3. Leave for approx 3-5 minutes to allow **Flair** to break down scale contamination.
4. Rinse off with fresh water.
