

DSC-100

Developer Tank System Cleaner

2 Part Deep Cleaner plus Neutraliser
Rapidly Removes Chemically Bonded Silver & Emulsions

Used for: Film & Paper Processors within NDT, Graphic Arts, Reprographic, Professional Labs, Mini-Labs, PCB Industries

Fast Acting - Non Fuming

HDSC-100 rapidly removes chemically bonded silver and developer from developer racks, rollers, tanks and pipe-work in approximately 45 minutes to 1 hour.

DSC-100 also removes silver build-up from wash / stabiliser racks and tanks.

Note: Do Not Use DSC-100 to clean fix racks or tanks.

Powerful Fast Acting Cleaner

DSC-100 starts to work on contact. Deep cleaning is fast and easy.

The rack can be cleaned separately from the processor, however if **DSC-100** is used with the developer rack left in the tank, this greatly improves the working efficiency of your processor by cleaning the developer tank pipe-work and pumps.

Using **DSC-100** stops fresh chemistry from being contaminated by old chemical build-up on racks and tanks thus improving the efficiency and life of your developer.

Important Notice

Full instructions for dilution and method of use for Hydra DSC-100 is enclosed with the product.

Pack Size

Each 6x1 litre pack of **DSC-100** cleaner contains 2 litres **Part A**, 2 litres **Part B** Cleaning solutions and 2 litres **Part C** Neutraliser.

Dilution

With a dilution of 1:10 each pack makes up to 40 litres working solution.
