

Zeta Gold pH

Biocidal Liquid Gel Skin Soap

Skin pH Balanced to Clean and Protect Skin in One Gentle Skin Cleaning Gel — Removes Chemical Stains and Grime

Cleans & Heals in One

Zeta Gold pH has been especially formulated to remove soiling including chemical stains, without robbing skin of its natural oils.

Within the photographic industry it is quite common for staff to experience very dry cracked skin or skin irritations, due to the continued use of chemicals and the difficulty of wearing protective gloves.

By using **Zeta Gold pH** regularly instead of normal soap hands are protected against drying and in the event of paper cuts or infections **Zeta Gold pH** will help heal the abrasions.

Lanolin & Perfume Free

Zeta Gold pH is enriched with natural plant extracts which condition and soften the skin without using lanolin or glycerine, which can leave hands feeling sticky and causes greasy marks to be left on finished work or surfaces.

Antiseptic Properties

Zeta Gold pH's antiseptic properties promote the fast healing of cuts, grazes and skin related diseases including eczema and helps prevent dermatitis caused by chemical contamination.

Regular use of **Zeta Gold pH** will condition skin, prevent infection and re-infection and will help hands regain their natural moisture content.

Zeta Gold pH is effective against many harmful bacteria, viruses, fungi and micro-organisms including: MRSA, Influenza, Salmonellae genera, Streptococcus pyogenes, Staphylococcus sp, Pseudomonas sp, Lactobacillus sp, Campylobacter Pseudomonas fluorescens and Hepatitis B.

Complete Package

Please see picture above. **Zeta Gold pH** is packaged in 1 litre free standing bottles with plunger. We also supply cages which can fit onto any wall surface.
